

# Capability Statement

## Who We Are

Established in 2014, WIN Trio, LLC (WIN Trio) is a Small Business Administration (SBA) **8(a) Certified** and Historically Underutilized Business Zone (**HUBZone**) organization with a successful record of delivering high-quality technical and professional services to several federal and commercial customers. Our SMEs provide horizontal depth across the public sector with verticals in Cyber Security, Cloud/DevSecOps, Emerging Tech & IT Modernization, and Admin & Program Management domains to enable our clients to build, secure, and digitize their environments through continuous innovation.

### Company Information

Musharaf Rashid, President  
mr@wintrio.com, 704.287.5645  
Entity ID: E9GWUWJTVME7  
Cage Code: 7D8H8

### Contract Vehicles

**GSA Stars III Contract #:** 47QTCB21D0194  
(IT, Emerging Tech, & OCONUS tracks)  
**GSA MAS Contract #:** 47QTCA20D007S  
(Cyber HACS, Cloud, PSS, and IT70)

### Certifications

**SBA**  
**8(a) Certified**  
Valid thru 2030

### NAICS Codes

\*541511, 541512, 541513, 541614, 541519, 541611, 541618, 541690, 518210, 561110, 423430

## Our Service Offerings

### Cyber Security

- Cyber Security Policy, Planning and FISMA Compliance
- Continuous Diagnostics & Mitigation (CDM)
- Cyber Security Assessment Management (CSAM) Implementation
- Incident Response, Pen Testing, and Vulnerability Management
- Cloud, Network, and App Security

### Cloud/DevSecOps

- Cloud, Network, App, and Data Optimization
- Cloud Governance and Migrations
- Automation and Security Integration into CI/CD Pipelines
- Continuous, Intelligent, and Proactive Monitoring

### AI, Emerging Tech & IT Modernization

- Enterprise Architecture and Roadmaps
- AI / Predictive Analytics, Data Strategy, Business Intelligence & Visualization
- Cloud and Data Center Consolidation
- Assessments and Agile Transformation

### Admin & Program Management

- Scope, Sched, & Cost KPIs' dashboards
- EVM, Integrated Sched, Risk, & Controls
- Continuous Process Improvement (CPI)
- Admin Support and Stakeholder Mgmt

# Corporate Experience

## Cloud and Database Services US Department of Agriculture (USDA/NASS/OIG)

**Focus Areas:** Project Management, Secure & Agile Software Development, Migration, Data Management, Legacy Sys. Modernization

- **Recipient of the Circle Award from the USDA Administrator, recognized as the top-performing vendor**
- Improved product quality by designing standardized/reusable platform, NICE for agency-wide future development by leveraging standardized set of software services, resulting in significantly cost savings.
- Implemented a cloud migration strategy and roadmap to move USDA NASS legacy apps to Azure centric platform.
- Instrumental in creating standardized data platforms, optimizing Agency costs, and further strengthening their organizational security posture.
- Developed DevOps & Agile communities of practices that enabled stakeholders to collaborate on ideas and best practices across the Agency.
- Improved project governance through automation and simplifying mission-critical processes and creating standardized UI frameworks.

## Support for Platform Engineering and DevOps Integration (SPEDI) Department of Homeland Security (DHS), US Citizenship and Immigration Services (USCIS)

**Focus Areas:** Project Management, Cyber, Cloud, DevSecOps, Automation, AI/Data Analytics, Legacy Systems Modernization

- Key Cyber services (Identity & Access Mgmt, Controls Assessments, Vulnerability & Incident Mgmt, Pen Testing, DevSecOps & Ops. support) for 65+ complex and heterogeneous IT systems.
- Performed **scans for nearly 80,000 assets monthly**. Devised a continuous and proactive monitoring solution (backed by predictive analytics).
- Designed, developed, and migrated mission critical apps into a multi-cloud environment (AWS, Azure, and GCP).
- Supported Cloud Migration and Data Center Management, fully automated systems monitoring and systems design.
- Established fully automated approach to system deployments, cloud provisioning, security hardening, enterprise CI/CD pipelines, resulting in significant cost savings, increased systems availability, and improved productivity.

## IT Modernization, Analytics, and Cloud Migration Walmart Innovations Lab

**Focus Areas:** Supply Chain, Project Management, Cloud, DevSecOps, Mobile Computing, AI/ML, Data Management, OCONUS

- Provide broad range of digital transformation services, supply chain reconfiguration on a real-time basis for Walmart global teams.
- Enabled client to reconfigure entire supply chain through mobile device by securely connecting to TPV systems on the fly.
- Enabled client to ingest and correlate enormous amounts of data (business and ops) to perform Predictive Analytics and increase sales.
- Leveraged numerous AI/ML-based techniques to formulate data models, established KPIs, and devised visualization dashboards.
- Cloud & DevOps **support for 50+ global teams** with design, automation, BPR, and advisory services for cost optimization.
- Services included architecture and development (cloud-based systems, security, data analytics, and mobile), DevOps, and operational support (continuous and intelligent monitoring, 24\*7 incident response, and help desk services).

## Healthcare Systems Modernization Strategy Federal Employee Program Operations Center (FEPOC)

**Focus Areas:** Healthcare Systems Transformation, Mainframes to Cloud Modernization, AI/Data Analytics, Business Strategy

- Leveraged deep healthcare expertise to migrate legacy/mainframe apps to cloud resulting in streamlined processes and reduced costs.
- Created baseline assessment of current legacy/mainframe systems and devised Cloud Adoption Framework (CAF) to migrate apps to cloud.
- **Supported 30+ mission critical apps** encompassing health care claims, benefits, eligibility, enrollment, plans and carriers mgmt, Personally Identifiable Information (PII), Protected Health Information (PHI), clinical data, and financial data.

*"WINtrio is a very valuable asset to the Enterprise Infrastructure Division Security. They work tirelessly to meet all security objectives within the agency. They make sure that all requirements are met, OHS security controls are enabled, and that compliance is current. Without WINtrio, EID would be in a lot of trouble." - IT Specialist, EID, DHS/USCIS*
